# WE ARE KAYO

The Kayo brand was launched in 2002. There was a void in the market for well-built, reasonably priced ATVs and Dirt Bikes. We decided to change that. Our in-house team designed, developed, and manufactured those early models which we sold on the European market. The demand increased, and we started branching out internationally.

From those humble beginnings, we now manufacture over 50,000 units per year. Never losing our focus of building small to medium displacement, off-road motorcycles, and ATVs with exceptional quality and reasonable pricing. We want to get everyone riding again!

# ATVs

Kayo ATVs were born out of necessity. Affordable ATVs were inferior and the market seemed to be closed off to those who just want to have fun without spending an arm and a leg.

*So we set our sights on changing all that!*

The catalog you are holding showcases our latest ATVs. From 70cc up to 200cc, available in sport and utility versions. We stand behind our machines by offering a Warranty that rivals any in the industry.

What are you waiting for?  
Try out a Kayo, as we say...

# DIRT BIKES

Kayo started building dirt bikes in 2002. Since then we have been selling dirt bikes internationally with great success.

We developed the 250cc water-cooled T6 in 2013 and it claimed the Chinese National Championship.

All of our accomplishments and experiences have taught us how to build great dirt bikes. We also understand not everyone is lining up to race. With those riders in mind, we present our 2021 lineup of dirt bikes.

Affordable, reliable, and just plain fun to ride.

What are you waiting for? Try out a Kayo, and as we say...
